Hetman Partition Recovery Free Alterantive.Q: VBA - using a variable as a day I've just started learning VBA, and I'm stuck on a simple one: I want to create a loop that does this: variable == day but I want the answer to be the day of the week (e.g., 1) so that it skips to the next day of the week (Monday, 2). I've made a code, but I'm pretty sure it's completely wrong and I'd like to know if someone can help. Thanks a lot in advance :) def day1(day) For var = 1 To 7 If (var == day) Then 'does stuff End If Next End Definition A: It might look like a 'looping' problem but it's actually a validation of the day. So you want to test if day1 is equal to either 1, 2, 3 or 4. And this is easy. To check if a number is equal to something you can use the IsDate function. Here you can see how to use it for a day in various ways. A: Just add in an else: def day1(day) For var = 1 To 7 If (var = day) Then 'does stuff End If Next Else 'else does stuff End if End defintion EDIT: the definition isn't really needed. If you put it in the function you can
