Jan 10, 2020 Xentry - Fix 2221-45 - The error does not appear if the computer is not connected to the internet, and it does not appear if the computer is disconnected from any network . All you have to do is simply follow the link in the form below, download the file and install it on a USB. Step: 1. Unzip the downloaded file.Step: 2. Insert the USB into your computer.Step: 3. Put your computer into the internet step: 4. Choose your language.Step: 5. Follow the rest of the instructions provided in the program.Step: 6. After done, you should be able to use a custom TOSLINK cable to communicate with your car. Xentry Using the software, you can setup the cable easily and connect it to the car. You can create a custom cable by joining the two copper connectors to get the best signal. To download the included cable, follow the following steps: Step: 1. Install the software.Step: 2. Click on "Add / Scan a cable".Step: 3. Make sure the "TX 1" and "TX 2" are assigned to the right sides of the two 'copper - copper' connectors that you are going to join.Step: 4. Make sure the "RX 1" and "RX 2" are assigned to the left sides of the same connectors.Step: 5. Click on "OK". Xentry can set up the final parameters for the cable like bandwidth, B1 & B2 setting, and power type. After all the configuration is done, you can click on "OK" button to start configuring the cable. Step: 1. Connect the cable connectors to the Xentry port and program.Step: 2. Turn on the car computer.Step: 3. Make sure the red arrow lights are on.Step: 4. Click on "TOSLINK" button. After the car is successfully connected, the PC software should display "Success" after a few seconds. STEP: 5. Click on "OK" button to save the settings.
